Lexogen achieves ISO 13485:2016 certification

Dear Customers, Dear Colleagues,

We are delighted to share that Lexogen has achieved the **ISO 13485:2016** certification from **Quality Austria**, confirming our dedication to providing top quality products and services as well as meeting or exceeding the legal requirements and the rigorous quality standards required in the medical device industry.

This stringent quality standard that guarantees the safety and efficacy of medical devices (or critical components used therein) has been earned for research, product design, development, and production of Lexogen's genomic analysis solutions (kits, reagents, and software).

Obtaining **ISO 13485** certification is an important milestone for Lexogen. This achievement highlights our unwavering commitment to providing cutting-edge biotechnology solutions, built with our customers' needs in mind, that meet the highest quality standards. It reinforces our position as a trusted partner in the industry and demonstrates our dedication to customer satisfaction.

This significant step would have never happened without your direct or indirect support!

Many thanks for your contribution and for your trust in Lexogen.

Stéphane Barges
CEO of Lexogen
